

Please keep your hands out of paid services like XM Radio. We have invested our hard earned money to pay for a product like XM Radio. It's just a short time away till the FCC ruins any kind of entertainment that the American public wants to hear. I CHOSE to pay for XM Radio because of it's great services like commerical-free non-censored radio - and now you are trying to impose on that. I wish the FCC would realize that if the American public doesn't like to hear something on TV or radio they can use the magical 'Off' button and turn it off. I urge you to reject this proposed bill and let the American public who is paying \$120 a year of their hard earned paychecks to enjoy this fine product to listen to it as it is today.

Thank you for listening to this and other censorship issues while deciding the fate of entertainment on TV and radio today and in the future.
